Vision Technology Products
2016/2017
A GLOBAL BRAND WITH TRADITION

Since its establishment in 1913, Eschenbach Optik has been combining traditional business values with modern innovative flair. Within a century Eschenbach Optik has become one of the leading suppliers of optical products - both in Germany and abroad. The product range extends from eyewear frames and sunglasses, to binoculars and right through to magnifiers, reading glasses and special vision aids.

With subsidiaries in twelve countries, more than 30 international trade partners and over 480 employees throughout the world, today Eschenbach Optik has a global presence.

VISION TECHNOLOGY PRODUCTS

In this catalogue you will find our extensive range of magnifying vision aids. The term “Vision Technology Products” stands for innovative research and development, modern technologies, as well as precision production methods - and a level of quality which meets the very highest demands in terms of optimum optical performance, reliability and intuitive operation.

The diversity of our range of magnifying vision aids allows you to provide your customers with the optimum solution for meeting all their everyday vision requirements.

LOW VISION

In our catalogue you will therefore find a wide range of products to meet the highly diverse needs of those suffering from visual impairment, making their daily life so much easier and therefore enabling them to regain maximum independence and maximum quality of life.

EASY VISION

As we get older, our vision deteriorates and this is something that happens to everyone. From the age of 60, this change becomes increasingly noticeable and sometimes even the best corrective eyewear is not enough. With the “Easy Vision” concept from Eschenbach Optik, additional, innovative optical products are able to compensate for the visual impairment and relaxed vision is once again possible.

SALES SUPPORT

On pages 66-77, you can find our range of sales support products – including versatile displays and attractive presentation systems. Ask your representative about further advertising opportunities.

DETAILED INFORMATION

The “Technical Information” section contains a summary of technical specifications and you can find information on visual impairment in the “Information” section.

INDIVIDUAL LENS RANGE

Single vision or multifocal spectacle lenses with corrections to suit specific individual requirements, cut-off filters with individual strengths and reading glasses with individually adapted high additions can be found in the separate “2015 Individual Lens Range” catalogue.

HAND-HELD MAGNIFIERS
AND
READING MAGNIFIERS

OPTIMUM VISION COMFORT – ALWAYS READY TO HAND.
ILLUMINATED POCKET MAGNIFIERS

mobilux® LED

- Batteries are easy to change as the battery cover is easy to open and contact springs clearly indicate the battery position.
- Improved comfort due to eyelet for lanyard.
- The most suitable colour temperature and light intensity can be selected by attaching one of the three filters supplied.
- The LED light does not require changing. The LED light used by Eschenbach Optik has a service life of approx. 50,000 hours.
- The battery life is up to 10 x longer in comparison to a conventional light.
- Bright, even illumination provided by SMD LED and collimation optics.
- Defined focusing distance: in the case of all aspheric magnifiers and reading magnifiers from Eschenbach Optik the focusing distance (aE: distance from the eye to the virtual image) is precisely 400 mm. The image can therefore be seen clearly with readers which have an addition of +2.5 dpt.

mobilux® DIGITAL Touch HD can be found on page 28.

CUSTOMER BENEFITS

- Suitable for reading small print, e.g. in a telephone directory or on price tags.
- Simple to use – large, easy to operate light switch and eyelet for lanyard.
- Choice of 3 different lights colours via filters.
- The batteries are easy to change.
- A step-up converter controls the voltage for constant bright illumination over the whole lifetime of the battery.
- Incl. protective case for lens.

* Commercial magnification
** Diffractive aspheric lens without cera-tec® coating

Accessories:
See page 6 for mobase Order Nos. 1511001, -2, -3, -4
Lanyard Order No. 15981

The appropriate display is available as an option on page 76.
**mobase** NEW

- High quality stand for mobilux® LED.
- Can be used in two positions: laid flat for reading or standing for working.
- Individual design for every mobilux® LED ensures the exact viewing distance.
- Practical plug-in function for easy conversion to handheld use.

Four different mobase designs available for all nine mobilux® LED models:

<table>

Special feature of mobase 1511003:
Stand with additional 1/4" thread. This enables it to be screwed onto a standard flexible tripod. The stand enables you to freely adjust the distance of use and it can be used with all mobilux® LED magnifiers.

Example image of a conventional stand. Only available as an optional extra. This is not an Eschenbach accessory.
easyPOCKET

- The tiny lens with powerful magnification.
- Diffractive aspheric lens.
- Illumination: ultra-flat SMD LED.
- Product dimensions: 86 x 54 x 6 mm.
- **Replacement battery:** Order No. 15471, requires 2 batteries.

**CUSTOMER BENEFITS**

- Magnification and illumination in a credit card format; the ideal size for any pocket.
- Provides a brilliant image with optional illumination when you slide the lens out of its case.
- Ultra-flat and lightweight design.
- Compact case ensures safe storage.
- Very economical: The light is only switched on when you slide the lens fully out of its case.
- The LED light does not require changing. The tiny, extremely bright LED light used by Eschenbach Optik has a service life which is virtually unlimited.

---

easyPOCKET XL **NEW**

- Compact hand magnifier with stand.
- Diffractive aspheric, ultra-flat lens.
- A flip-out stand enables it to be used as a stand magnifier.
- Large homogenously illuminated field of view.
- Illumination: bright, super-flat SMD-LED.
- Magnification 2.5 x.
- Product dimensions: 113.5 x 63 x 8.8 mm.
- **Replacement battery:** Order No. 15473, requires 2 batteries.

</tr>
</tbody>
</table>

**CUSTOMER BENEFITS**

- Enlargement and light in a compact format.
- Brilliant depiction with integrated illumination when pulling out the lens.
- Magnifier can also be used as a stand with the integrated strap.
- Large viewing area with super-flat lens.
- Fits in any pocket thanks to the flat design and very low weight.
- Case for safe storage.
- Very economical: light only comes on when the lens is fully extended.
- Bulb does not require changing: The LED optics used by Eschenbach has a virtually unlimited lifespan.

---

Can also be used as a stand magnifier.
**mobilux® ECONOMY**

- Batteries are very handy to change – when the battery compartment is opened, the upper and lower sections of the housing remain connected via a hinge and can be easily closed again.
- Bulb: NF lens bulb 2.5 V, 250 mA, E10. **Replacement bulb:** Order No. 1544 (see page 64).
- Defined focusing distance: in the case of all aspheric magnifiers and reading magnifiers from Eschenbach Optik the focusing distance (\( f \): distance from the eye to the virtual image) is precisely 400 mm. The image can therefore be seen clearly with readers which have an addition of +2.5 dpt.

**CUSTOMER BENEFITS**

- Great value illuminated pocket magnifier with NF filament bulb.
- Ideal for reading small print at home and on the move, e.g. when searching for telephone numbers or looking at prices in the supermarket.

**Accessories:**

- Microfibre drawstring pouch for safely storing the pocket lens.
- The pouch can also be used for cleaning the lens.

**APLANATIC READING MAGNIFIERS**

**mediplan ERGO**

- Edge-to-edge aberration-free image.

**CUSTOMER BENEFITS**

- Edge-to-edge distortion-free image.
- Ideal for reading and looking at pictures for long periods of time.
- Comfortable to use due to the ergonomically shaped handle.
- Aplanatic reading magnifiers provide an edge-to-edge distortion-free image which makes them especially suitable for those suffering from a loss of central vision.

**CUSTOMER BENEFITS**

- Ideal for those fine motor tasks that require two hands such as knitting or handicrafts.
- The round-the-neck cord can be adapted to suit individual requirements.

*Only for maxiPLUS (2678):*

- The additional lens enables the user to see extremely small details.

**ROUND-THE-NECK MAGNIFIERS**

**maxiPLUS/economy**

- Transparent frame for shadow-free magnification.
- Non-slip foam rubber pads on the feet.
- Individually packaged and includes round-the-neck cord.

**Additional product feature of maxiPLUS (2678):**

- Large rectangular lens with 2 x magnification and separate additional lens with 4 x magnification for particularly detailed work.

**CUSTOMER BENEFITS**

- Transparent lens frame.

visoflex

- The flexible solution for every occasion.
- A stand magnifier with an inclined view is created by opening out the handle ends; a stand magnifier with a straight view can be created by rotating and then folding the handle ends towards each other.

combiPLUS

- The practical all-rounder for multi-use.
- Supplied with a fine grain black leather case with soft inner lining to protect the lens.

CUSTOMER BENEFITS

- Can be used as a hand-held magnifier with fold-out handle.
- Can be used as a stand magnifier: fold-out metal feet enable the lens to be tilted for a comfortable viewing angle.
- Suitable for reading, writing and handicrafts.
- Includes protective case.

| 2608  | 250 x 35 mm| 1:1.8         | • Incl. red guide line |

CUSTOMER BENEFITS

- „Tremble-free“ image as the bright field magnifiers are placed directly on the reading material.
- Very handy and compact.
- Due to their high accommodation capacity, these bright field magnifiers are particularly suitable for children to support the remaining visual acuity.
- Bright field magnifiers are also ideal as combination magnifiers (in combination with high addition or systems with reading caps).

Example:

High addition 6 dpt = 1.5 x  
+ Bright field magnifier = 1.8 x  
Total magnification = 2.7 x

With a bright field magnifier the reading distance of 18 cm (6 dpt) remains the same with double the magnification!

powerlux

- The new generation of illuminated magnifier.
- Available in warm and cold white colour temperature.
- 2 SMD LEDs are positioned opposite each other to provide shadow-free illumination.
- Supplied with protective hard foam case.
- Economical power consumption due to automatic switch-off function which turns the powerlux off after 30 minutes.

CUSTOMER BENEFITS

- Very simple to use, the ergonomic design promotes intuitive movement on the reading material.
- Automatic switch-off function, preserves battery life.
- Very comfortable to hold in the hand.
- Consistently bright and glare-free illumination.
- Ideal for people with visual impairment who appreciate award-winning design.
- Suitable for both left and right handers.

Details relating to magnification/dioptre value/recommended eye-lens distance are stated on all magnifier heads.

- Bright, even illumination of the reading text provided by enclosed magnifier heads made from a light material.
- To achieve a uniform reading distance, Eschenbach Optik recommends using the system varioPLUS in combination with a reading stand (Item No. 1605, see page 64).

For technical information please refer to page 78.
**Battery handle:**
- Battery handle with filament bulb.
- **Replacement bulb:** Order No. 1545 (see page 64).

**Battery handle, LED:**
- LED illumination.
- LEDs have an unlimited service life and do not require changing, extremely economical to use.
- Easy to change, attachable filters provide a choice of three different colour temperatures.
- Step-up converter for even, consistently bright illumination.

**Accessories:**
- **Case.**

* Magnifier head, without handle  ** with battery handle 159910  *** with battery handle 1599144
visolux+

- A plus in visual comfort.
- Even, bright and glare-free illumination provided by two SMD LEDs.
- Integrated, preselectable orange filter for second warm colour temperature.
- Hard foam case included.

scribolux

- NEW: Push-button switch for easy on/off operation.
- NEW: Automatic light-off function after 30 minutes to avoid unnecessary power consumption.
- High level of image brightness and large visual field.
- Distance lens – supporting surface: 7.5 cm (apex of lens).
- In the case of all aspheric magnifiers and reading magnifiers from Eschenbach Optik the focusing distance (d_E: distance from the eye to the virtual image) is precisely 400 mm. The image can therefore be seen clearly with readers which have an addition of +2.5 dpt.
- Supplied with microfibre pouch to protect the lens. The pouch can also be used for cleaning the lens.

CUSTOMER BENEFITS

- Plenty of space for writing under the lens as the lens is positioned at a spacious distance from the supporting surface and the magnifier base has an open design.
- Easy to move across the reading material.
- With comfortable tilted lens.
- Bright, even and glare-free illumination.
- Leaves both hands free for carrying out tasks under the scratch-resistant lens without shadowing.

CUSTOMER BENEFITS

- Comfortable to use due to ergonomic tilted lens and compact design.
- Incredibly large field of view with 3 x magnification.
- 2 different colour temperatures for even, glare-free illumination of the reading material.
- Light automatically switches off after 30 minutes to prevent unnecessary power consumption.

varioLED flex

- Ø 76 mm/6 dpt/2.5 x magnification.
- Aspheric PXM® lightweight lens, cera-tec® coated for a distortion-free image with edge-to-edge sharpness.
- Switch between ring illumination and segment illumination for examining surfaces.
- Illumination near point for shadow-free illumination: 3.5 cm.
- Illumination level: approx. 6000 lx (at a working distance of 150 mm).
- Provides full illumination power immediately.
- Gooseneck design with protective cover for improved hygiene.
- Secured via table clamp.
- Supplied with power adapter for EU, GB, US.
- Cable length: 3 m.

CUSTOMER BENEFITS

- Segment switching = provides a choice between ring illumination and segment illumination for closer inspection of different surface structures.
- As it is lightweight, compact and highly flexible this stand magnifier is extremely versatile.
- Optimum swivel range of magnifier head due to gooseneck stand in combination with biaxial lens mounting.
- Comfortable positioning due to ergonomic „magnifier grip”.
- Economical due to low power consumption as power requirement is only 5W, service life of LED approx. 50,000 hours.

CUSTOMER BENEFITS

- The field of vision can comfortably accommodate an entire DIN A4 page.
- The magnifier head can be variably positioned by adjusting the sturdy, jointed arm.
- The magnifier can be used with near or distance glasses.
- Angled view ensures comfortable reading position.

- Equally suitable for both hobby and professional use.
- The magnifier can be used with distance or near vision glasses.
- The lens is protected by a hinged dust cover.
- Relaxed reading position due to comfortable angled view.
varioLED

- Ring lighting provided by 36 long-life high performance LEDs with primary lens system for optimal concentration of light and shadow and flicker-free working.
- Approx. 5,000 lx (at a 20 cm working distance) – provides full illumination power immediately.
- Aspheric PXM® lightweight lens, cera-tec® coated for a distortion-free image with edge-to-edge sharpness.
- Hinged and removable lens cover.
- Magnifier head has 6 joints to ensure optimum positioning.
- Tilting range of magnifier head: 180°.
- Can be operated using one hand.
- Cable length: 3 m.
- Supplied with table clamp for table top thicknesses of 18-74 mm.

CUSTOMER BENEFITS

- Shadow-free and flicker-free illumination.
- Brightness can be adjusted to suit individual requirements.
- Can be used with distance and near vision glasses.
- Minimum power consumption due to low power requirement of the LED which is only 15 W.

27729 Table base
- Cast iron, 260 mm Ø, weight 6 kg.
- Suitable for stand magnifiers 27722, 27770 and 27771.

27718 Screw attachment
- Permanent attachment of the stand magnifier onto a work surface. For use in the office or workshop.
- For assembly, the work surface needs to be drilled (hole Ø 12 mm). Suitable for table top thicknesses of 25 to 30 mm.
- Suitable for stand magnifiers 27711, 27722, 27770 and 27771.
HIGH QUALITY TECHNOLOGY FOR BRILLIANT VISION.
smartlux® DIGITAL

- The elegant magnifier for brilliant vision.
- Display: non-reflective 5” LCD.
- LCD brightness can be dimmed in the case of a high level of glare sensitivity.
- 5 viewing modes: True colour as well as contrast-enhanced black/white, white/black, black/yellow, yellow/black.
- Generous depth of focus for variable viewing distances.
- Incremental magnification from 1.7 to 12 x, depending on use.
- Freeze-frame and image capture function: images can be quickly captured. If required, up to 20 of these images can be permanently stored and managed.
- Integrated stand which can be adjusted for 3 different uses:
  - stand fully retracted for hand-held use
  - stand fully extended for placing on reading material
  - stand partially extended for writing or working hands-free under the display
- LEDs can be switched off, for use on gloss surfaces.
- Automatic shut-off if the device has not been used for approx. 3 minutes to ensure low power consumption.
- Dimensions: 174 mm x 90.3 mm x 40.1 mm.
- Weight: 220 g.
- Large RESET button, in a protected position under the folding stand.
- Battery run time: approx. 2.5 hours, charging time: approx. 2 hours.
- Lithium ion rechargeable battery.
- Mains voltage requirement for battery charger: 110 V-240 V, 50-60 Hz.
- Supplied with adapter for EU, GB, US, AUS.
- Comes supplied with a lanyard for wearing the smartlux DIGITAL around the neck and a protective rigid foam case.

CUSTOMER BENEFITS

- Extra large field of view due to non-reflective 5” LCD and high magnification range.
- Makes reading simple as camera is centrally positioned under the display.
- Extra writing position for writing or working under the display.
- Easy to use due to large operating buttons which are easy to see and tactile.

The appropriate display is available as an option on page 75.
mobilux® DIGITAL Touch HD

- Non-reflective 4.3” display.
- Intuitive operation via touchscreen.
- HD camera for maximum definition and optimum contrast.
- Generous depth of focus for variable viewing distances.
- Stable support surfaces for different uses:
  - placed on the reading material for tremble-free image when reading lengthier texts
  - hand-held for orientation on the reading material and for headings
  - can be tilted for comfortable viewing angle
- 4 to 12 x magnification (hand-held at a distance of 5 cm approx. 1.9 to 4.5 x).
- 5 viewing modes: true colour, contrast-enhanced black/white, white/black, black/yellow and yellow/black.
- Line orientation (reading line) for improved continuity of reading.
- LCD brightness can be dimmed in the case of a high level of glare sensitivity.
- Image capture function for storing images on preinstalled SD card.
- The possibility of transferring images onto the computer via USB.
- Screen-reading function via computer monitor.
- LED light can be switched off for use on shiny surfaces.
- Automatic shut-off if the device has not been used for approx. 3 minutes to ensure low power consumption.
- Weight: 230 g.
- Battery run time: 2.5 to 3 hours, charging time: approx. 2 hours.
- Lithium ion rechargeable battery.
- Mains voltage requirement for battery charger: 110 V-240 V, 50-60 Hz.
- Supplied with adapter for EU, GB, US, AUS.
- Supplied with protective hard foam case, lanyard and cleaning cloth.

**CUSTOMER BENEFITS**

- Relaxed reading due to non-reflective, high contrast display.
- 2 in 1: handy reading device for when you’re on the move plus simple screen-reading device for use at home.
- Easy orientation and reading as the HD camera is positioned centrally under the display.
- Simple, intuitive operation via touchscreen with clearly recognisable symbols.
- You can write under the reading device when it is in the tilted position.

headlight LED

- Small, lightweight and compact LED light.
- Light can be concentrated at a specific working distance by means of CPC optics (Compound Parabolic Concentrator).
- Light is focused in a precise and glare-free manner.
- Power supply via handy, compact battery housing and cable.
- Flexible cable with additional adapter for attaching to eyewear temple.
- Virtually constant illumination throughout the entire lighting period.
- Illumination strength:
  - approx. 3,200 lx in 250 mm, 1,200 lx in 400 mm.
- Illumination period: approx. 8 hours in normal mode, approx. 14 hours in eco mode.
- Hard foam case included.
- Lamp housing:
  - Dimensions: 32 x 20 x 34 mm, Tilting range: vertical
  - Weight: 11 g.
- Battery housing:
  - Dimensions: 90 x 55 x 29 mm (without clip). 1 m cable length.
  - Weight: 60 g (without batteries).

CUSTOMER BENEFITS

- The light can be tilted vertically into the required position.
- Shadow-free and flicker-free illumination.
- Battery housing can be comfortably carried on the belt or in the shirt pocket.
- Low energy consumption as the light is optimised for use with rechargeable batteries.
Desk lamp

- Electronic ballast for flicker-free illumination.
- Metal reflector in lamp shade for optimum, even illumination.
- Illumination: approx. 1500 lx (at a distance of 35 cm).

Floor lamp

- As 16031, but in the design of a floor lamp.
- Height min. 117 cm up to max. 151 cm.
- Lamp is dismantled for delivery.
- Colour: silver.

Replacement tubes for lamps 16031 and 16033:
1603127 Replacement tube 24 W/2,700 K/GY10q
1603145 Replacement tube 24 W/4,500 K/GY10q

CUSTOMER BENEFITS

Desk lamp
- Highly adjustable arm – can tilt from vertical to almost horizontal.
- Highly adjustable shade – can be tilted horizontally by 180°, vertically and axially by 45° in each case.
- Height min. 32 cm up to max. 52 cm.
- Length of mains cable: 1.6 m.
- Lamp base is disassembled for delivery; screw assembly.
- Colour silver/anthracite.

CUSTOMER BENEFITS

Floor lamp
- The magnifier head has a very large swivel range which makes alignment to the reading material extremely easy.
- Extremely bright, glare-free illumination of the reading area.

CUSTOMER BENEFITS

Desk lamp
- Can be perfectly adapted to sitting habits as alignment to the reading material is extremely easy.
- Extremely bright, glare-free illumination.
- Easy to use and adjust.

Floor lamp
- Easy to use and adjust.
comfort visionLED

- Multi-layer diffuser technology for:
  - glare and hard shadow-free illumination,
  - 100% UVA/UVB light blocking and
  - up to 90% blue light damping.
- High colour reproduction index (CRI) at 90.
- LED lifespan: 50,000 hours.
- Energy consumption only 10 Watt.
- Timer function for automatic switch off after 2 hours.
- Night light function with reduced brightness.

Individual illumination
With the aid of 5 colour shades and 5 brightness levels, the illumination can be individually adjusted and modified to any purpose.

2,700°K warm, yellowish light, brightness levels: approx. 870 lx to approx. 180 lx
3,300°K warm, yellowish-white light, brightness levels: approx. 1,530 lx to approx. 270 lx
4,300°K warm white light, brightness levels: approx. 2,900 lx to approx. 560 lx
5,300°K white light, brightness levels: approx. 2,350 lx to approx. 430 lx
6,500°K cold white light, brightness levels: approx. 2,000 lx to approx. 400 lx

CUSTOMER BENEFITS

- Even and glare-free illumination with hard shadows.
- High black-white contrast.
- Very good colour reproduction.
- 5 different colour tones (2,700°K, 3,300°K, 4,300°K, 5,300°K, 6,500°K) adjustable in 5 brightness steps for individual lighting requirements.
- Individually adjustable light head that can be turned axially and horizontally by up to 355 degrees.
FILTERS

LESS GLARE.
MORE CONTRAST.
wellnessPROTECT®

wellnessPROTECT® XL

- Improved contrast vision and minimisation of glare by blocking short-wave, energy-rich light components.
- Available in the active photochromic options, in the following tints: 15 %, 65 %, 85 %, polarised 75 % and graded 50-15 % for inside and out.
- The phototropic lenses of wellnessPROTECT® active protect the eyes in all light conditions.
- Available in different frame sizes or as clip-ons, each including case.
- Frames are darkened on the inside and the upper edge of the frame extended to reduce the amount of light entering from the top.
- Transparent side shields protect against glare and allow orientation to the side.
- Side Ventilation slot between temple and middle section prevents fogging of the lenses.
- 100 % UV protection and up to 99 % blue absorption.

CUSTOMER BENEFITS

- All-round protection for the eyes against the harmful rays of the sun and against unpleasant glare.
- Improved contrast vision.
- Attractive design that makes wellnessPROTECT® look like sunglasses.
- Improved colour recognition in comparison to conventional cut-off filter eyewear.
- Ideal for spending long periods outdoors, winter sports, for eyes that are sensitive to glare, for retinal disease and following cataract operations.

Ideal for spectacle wearers: wellnessPROTECT® XL is intended for wearing over the correction frame.

wellnessPROTECT® filter lenses have an additional cut-off filter. In addition to UV light, they also absorb shortwave, energy-rich light components. Contrast vision is therefore improved and unpleasant glare is reduced.

wellnessPROTECT® is available with a variety of tints to suit any light conditions. The details relating to the filter lenses refer to the tint which is applied to the base filter.
Eyewear and clip-ons

- Glazed with wellnessPROTECT® plano lenses 15 %, 65 %, polarizing 75 %, 85 % and graded 50-15 %.

  The description relates to the absorption of the additional tint overlay on the base filter. It does not relate to the light transmission level of the entire filter.
  - material CR39
  - eyewear supplied in hard foam case
  - clip-ons supplied in soft case with belt clip

* wellnessPROTECT XL® glasses are meant to be put on over normal prescription glasses and because of the lens size are not intended for individual glazing.

Note: wellnessPROTECT® are also available with individual lens strengths.
Lenses

wellnessPROTECT® wP15
- Cut-off filter with 15 % tint overlay.
  Recommended use:
  - Indoors in the case of a high level of glare sensitivity.
  - Outdoors when the sky is cloudy.
  - Outdoors in the case of a low level of glare sensitivity.

wellnessPROTECT® wP65
- Cut-off filter with 65 % tint overlay.
  Recommended use:
  - Indoors in the case of a high level of glare sensitivity.
  - Outdoors in cloudy to clear weather.
  - Outdoors in the case of a medium level of glare sensitivity.

wellnessPROTECT® wP75P
- Cut-off filter with polarized 75% tint overlay.
  Strong reduction in reflection and additional contrast enhancement through polarisation.
  Recommended use:
  - Indoors in the case of a high level of glare sensitivity.
  - Outdoors in the case of a high level of glare sensitivity.
  - Outdoors in bright weather, sunshine.
  - Outdoors on the water, in snow.

wellnessPROTECT® wP85
- Cut-off filter with 85 % tint overlay.
  Recommended use:
  - Outdoors in sunshine.
  - Outdoors in the case of a very high level of glare sensitivity.

wellnessPROTECT® wP50-15
- Cut-off filter with graded 50-15 % tint overlay.
  Recommended use:
  - Indoors in the case of a medium to high level of glare sensitivity.
  - Outdoors in cloudy to clear weather.
  - Outdoors in the case of a low to medium level of glare sensitivity.
  - Ideal for reading indoors and outdoors.

wellnessPROTECT® wP active
- Photochromic lenses with additional cut-off filter.
  - Darkening according to the level of sunlight.
  Recommended use:
  - Owing to the self-tinting property are ideal for indoor or outdoor use.
  - For moderate to high sensitivity to glare.

Frames

The frames are also available unglazed, to accommodate individual prescriptions.

16635416 small frame, unglazed
  - temples can be shortened
16635716 large frame, unglazed
  - temples can be shortened
16635615 Ladies’ frame, unglazed
  - temples can be shortened
  - temples with adjustable pad arms
16635816 Men’s frame, unglazed
  - temples can be shortened
  - temples with adjustable pad arms
  - spring hinges

The catalogue containing the individual lens range and the „wellnessPROTECT® Order form“ can be obtained from our in-house sales department.
Cut-off filter eyewear

- Suitable above all for wearing outdoors.
- Troublesome shortwave components are filtered out in particular and at the same time a high degree of light transmission is also achieved. This means that the cutoff filters are suitable above all for those with visual impairment.
- The darkened upper edge of the glasses fits closely to the face and therefore provides effective protection against troublesome diffused light which can shine on the eyes from above. Additional protection is provided by the broad temples with integrated filters.
- Suitable for eye diseases such as cataracts, retinitis pigmentosa, macular degeneration, albinism, optic atrophy.
- 100 % UVA/UVB protection.
- Optical efficiency: ±0 dpt.
- Flexible temple ends with excellent fit.
- Two different frame sizes.

For reducing glare in the case of increased glare sensitivity.
Enhances contrast vision.
For wearing over a corrective eyewear frame.

</table>

The information outlined in the table above relating to the areas of use is a recommendation only and is not of universal validity.

It is always necessary to test out cut-off filters individually, preferably under the normal conditions of use, e.g. in the user’s own home or outdoors.
Cut-off filter clip-ons

- Contrast enhanced vision and reduction in glare through absorption of the short-wave, energy-rich ultraviolet and blue components of the spectrum.
- The use of cut-off filters is recommended in particular for conditions such as retinitis pigmentosa, macular degeneration, albinism, optic atrophy, aphakia.
- The contrast-enhancing cut-off filter clip-ons are attached to the correction frame and can simply be flipped up where necessary.
- Optical efficiency: ±0 dpt.

Polarised clip-on sunglasses

- UV 400 – 100 % UV protection.
- Polarsed.
- High quality design.
- Supplied with soft case.
- Suitable.

CUSTOMER BENEFITS

- The lenses have screw attachment, they are not riveted.
- Supplied with soft case.

CUSTOMER BENEFITS

- For reducing glare in the case of increased glare sensitivity.
- For contrast enhancement.

READING AIDS

READING ACCESSORIES FOR MAXIMUM VISION COMFORT.
ready2read

- A practical reading accessory for when you’re on the move.
- Equipped with a comfortable spring mechanism to unfold the lens. If not in use the lens is folded back into the protective case.
- In different colours or in an ornamental design.

CUTOMER BENEFITS

- Small, handy reading accessory for holding in front of the eyes. Fits in any pocket or larger purse.
- Includes a stretch band for attaching the ready2read to a key ring, ensuring it’s always at hand and ready to use.
- Can be used with just one hand.

clip&read

- Mini readers with anti-slip pads to ensure they sit securely at the temples.
- Available in 1.5 dpt and 2.5 dpt.
- Colours: ice grey and dark red.
- With case, incl. mobile connector and adhesive Velcro dots for attaching the case to a camera or bike.

THE READING AIDS ON PAGES 39-40 ARE ONLY FOR EMERGENCY USE, AS A SPARE OR ADDITIONAL PAIR OF SPECTACLES FOR NEAR VISION. THEY ARE ONLY INTENDED FOR SHORT TERM USE AND ARE NOT SUITABLE FOR DRIVING.
Ready readers

- Rimless readers.
- Available in 2 different colours.
- Strengths from 1.0 dpt to 4.0 dpt in 0.5 dpt increments.
- Plastic temples.

Readers

- Rimless readers.
- Available in a variety of designs.
- Strengths from 1.0 dpt to 3.5 dpt in 0.5 dpt increments.
- Metal frame.

miniframe

- Rimless readers.
- Discreet, classically elegant design.
- Strengths from 1.0 dpt to 4.0 dpt in 0.5 dpt increments.
- Metal temple, chromium-plated, length: 130 mm.
miniframe2

- Ready-to-wear readers in 5 different optical base values.
- A strength which decreases upwards by 1 dioptre from the lower edge to the upper edge of the lens.
- Sophisticated, classically elegant design.
- Ideal as an entry-level model or as a spare or additional pair of glasses.
- Temple colour: gun, gold, blue, red.

CUSTOMER BENEFITS

● An extended field of vision in comparison to conventional single vision readers.

The appropriate display is available as an option on page 77.

miniframe2 SUN

- Optical characteristics the same as miniframe2, but in addition:
  - 85% grey tint,
  - Filter Category 3,
  - 100% UV protection.

CUSTOMER BENEFITS

● Extended field of vision in comparison to conventional single vision reading glasses.
● No glare in sunlight due to tinted lenses.

The appropriate display is available as an option on page 77.
**miniframe BIFO**

- Ready-to-wear readers with +3.0 dpt and additional close-up segment.
- Additional close-up segment: +4.5, +6.0 or +7.5 dpt.
- Sophisticated, classically elegant design.
- Temple colour: gun, gold, blue, red.

**noves MONO**

- Maximum protection of lenses against mechanical influences and dust is provided by high-precision, diffractive nanostructures on the insides of the lenses.
- Lens thickness only 4.5 mm.
- Weight only 20 g.
- Opposite lens is frosted.
- The spring-hinged frame has adjustable temples, soft pads and easily adjustable pad arms.
- Supplied in a robust hard shell case.

**Note:** The option of ordering individual components enables you to optimise stock holding and also to carry out binocular correction, e.g. in the case of aphakia.

</table>

* Depending on the requirements, one magnifying lens and one frosted lens, or two magnifying lenses should be ordered in correspondence with the respective level of magnification.

**CUSTOMER BENEFITS**

- Easy Vision: readers with an additional close-up segment for small print or for reading details during hobby work.
- Low Vision: readers for orientation on the reading material and for reading using the additional close-up segment.
- Relaxed vision in both lens segments even at a short distance of use.

**Frames only**

- The spring-hinged frame has adjustable temples, soft pads and an easily adjustable pad arms.

1681-1222: Colour gold matt
1681-1222: Colour gun gloss

**CUSTOMER BENEFITS**

- Monocular reading glasses with magnifying lenses and visually appealing, discreet design. The thickness of the lens is only 4.5 mm and this means that the lens strength is inconspicuous.
- This ensures a high level of acceptability when wearing in public e.g. for reading the menu in a restaurant.
- The half-eye design facilitates orientation above the eyewear.
**HIGHER ADDITIONS**

### prismatic BINO comfort

- Binocular readers with a higher addition and prismatic convergence support.
- Eschenbach Optik prismatic bino is available in five different strengths with convergence-supporting prisms corresponding to the respective strength.
- Not only achieves outstanding results but also looks good – stylish design means high level of acceptability.
- The spring-hinged frame has adjustable temples, soft pads and easily adjustable pad arms.
- Supplied in a robust hard shell case.

### noves BINO

- Magnifying readers with prismatic convergence support for magnification requirements of up to 2.50 x.
- The lenses have a very subtle appearance. They have a uniform thickness of 4 mm, regardless of the optical power.
- Maximum protection of lenses against mechanical influences and dust is provided by high-precision, diffractive nanostructures on the insides of the lenses.
- The half-eye design facilitates orientation above the eyewear.
- Weight: only 18 g.
- The spring-hinged frame has adjustable temples, soft pads and easily adjustable pad arms.
- Supplied in a robust hard shell case.

</table>

**Note:** The distance values should lie within a range of ± 1 dpt (sphere, cylinder). In the case of greater variances in distance values, we recommend that the prismatic half-eye glasses are individually fitted using the Eschenbach Optik System Individual.

### CUSTOMER BENEFITS

- Relaxed binocular vision with high magnification.
- These exceptionally discreet and thin lenses are particularly suitable for high optical powers.
The UniVision® Hyperocular system

- Easy application – the adhesive tape ring enables easy correction of the lens position before the lens is attached permanently to the spectacle lens.
- Cost-efficient – more favourably priced than other hyperocular systems offering comparable magnification.
- Easy to change – if there is a change in the refraction or addition requirements, the lens can be quickly and easily attached to a new lens or replaced by a stronger lens.
- Anti-scratch coating – the front of the lens has antiscratch coating for protection during everyday use.

CUSTOMER BENEFITS

- Discreet appearance – with a diameter of only 22 mm and the transparent tape ring, the UniVision® lens is barely noticeable.
- Ultra-light – the lens weighs only 1 gram.
- Can be used immediately – the lens is fitted onto the spectacle lens on-site, the customer therefore does not need to wait for the delivery of special lenses.

TELESCOPES

MAGNIFICATION SYSTEMS
FOR EVERY OCCASION.
teleMED/ridoMED

- Coated lens system.
- Adjustment of pupillary distance of 54–74 mm.
- Lens diameter 23 mm.
- Focusing/dioptric compensation adjusted individually for each eyepiece.
- Ocular-side additional correction is possible, e.g. cylinder correction.
- Sturdy carrier frame made from glass fibre reinforced, black plastic.
- Comfortable, easily adjustable saddle bridge.
- Supplied in black zippered case.

maxEVENT

- Special vision aid for using at public events such as the theatre, musicals, concerts, the cinema and also in stadiums.
- Extremely comfortable to wear.
- Temples can be adjusted without having to be warmed.
- Very high PD tolerance range of 60-68 mm.
- Easy adjustment of dioptric compensation: -2.25 to +3.75 dpt, right/left can be separately adjusted, cylinder correction is not possible.
- Reflective objective lenses.
- Supplied in hard foam case.

### CUSTOMER BENEFITS

- **Allows the user to get closer to the action on the stage at concerts, the theatre, the opera, musicals and many other events.**
- **This vision aid will ensure you don’t miss out on any detail or any movement on-stage.**
maxTV®

- Extremely comfortable to wear.
- Easy adjustment of dioptré compensation: ±3.0 dpt, right/left can be separately adjusted, cylinder correction not possible.
- Temples can be adjusted without having to be warmed.
- PD range: 60-68 mm.
- Main distance of use: 3 m.
- Supplied in hard foam case.

CUSTOMER BENEFITS

- Enables you to see the TV in double the size – particularly important when viewing small screens.
- Relaxed viewing at any distance through individual focusing.
- Comfortable to wear and will not slip down during use due to easily adjustable temples.
- Ideal for reading subtitles and all text on the screen.

maxTV® Clip

- Galilean clip-on system with flip-up lenses.
- For clipping onto the existing prescription eyewear.
- PD range: 60-68 mm.
- Main distance of use: 3 m.
- Supplied in hard foam case.

CUSTOMER BENEFITS

- Specially designed for spectacle wearers.
- Enables you to see the TV in double the size – particularly important when viewing small screens.
- Ideal for reading subtitles and all text on the screen.
maxDETAIL

- For demanding detailed work.
- Easy adjustment of dioptr compensation: ±3 dpt, right/left can be separately adjusted, cylinder correction not possible.
- Easily adjustable temples (can be adjusted without warming).
- Large PD range 60-68 mm.
- Working distance approx. 40 cm.
- Supplied in hard foam case.

CUSTOMER BENEFITS

- Both hands are kept free for carrying out intricate work, handicrafts or reading.
- Comfortable working distance and large visual field; lightweight, contemporary design.
- Modern, practical design.

maxDETAIL Clip

- For demanding detailed work.
- Galilean clip-on system with flip-up lenses.
- Working distance of approx. 35 cm.
- PD range: 60-68 mm.
- Adjustable lens height.
- 5 height settings possible.
- Supplied in hard foam case.

CUSTOMER BENEFITS

- Specially designed for spectacle wearers.
- Both hands are kept free for carrying out intricate work, handicrafts or reading.
- Large visual field and comfortable working distance.
GALILEAN SYSTEMS

- The Galilean systems Galilei 2.0 GF, Galilei 2.2 x and Galilei 2.5 x are mounted on the system carrier frame for use.
- The Galilei systems are installed using the 1625 adapter system (see page 52).

Galilei 2,0 GF

- The Galilean system is set at infinity, reading caps are used for reading (see table).
- Ocular and objective lenses have a high-quality, anti-reflection hard coating.
- Field of view 22°.

CUSTOMER BENEFITS

- Large visual field, ideal for fluent reading.
- Also suitable for watching television.
- Lightweight therefore very comfortable to use.
- Not affected by age-related shaking due to low system magnification and large visual field.

</table>

* The figures stated for visual field are average values. They will vary depending on the distance from the eye to the eyepiece. Further information can be found on page 78.

- Reading caps are easy to use: they can simply be flipped up out of the way without being removed.
- The reading caps +3 dpt/+4 dpt/+5 dpt are also suitable for binocular use when used with the corresponding convergence adapter.

1630 Fitting case

The contents of the fitting case will enable you to test most of the adjustments for close range and distance which this system allows.

Contents: 2 x 1623 with trial frame adapters, 1 each of: 16230, 16233, 16234, 16235, 16236, 16238, 162310, 162312

162510 Fitting instructions
**Galilei 2,2 x**

- Excellent optical imaging quality.
- The Galilean system is set at infinity, reading caps are used for reading (see table).
- Weight 16 g, with reading cap 22 g.
- High quality, silicate lenses, MgF₂ coated.
- Field of view 14°.

**Galilei 2,5 x**

- Easy to adjust.
- The Galilean system is set at infinity, reading caps are used for reading (see table).
- Ocular and objective lenses have a high-quality, anti-reflection hard coating.
- Field of view 13°.

**Reading caps:**

<table>

<td>2.5 x</td>
<td>230 m/1,000 m</td>
<td>∞</td>
</tr>
</tbody>
</table>

**CUSTOMER BENEFITS**

- Ideal for watching television and reading (in combination with reading caps).
- Simple to use due to large visual field.
- Ultralight, only 11 g – therefore extremely comfortable to use.

- Reading caps +3 dpt/+4 dpt/+5 dpt are also suitable for binocular use (close-up).

The 1632 and 16321 fitting cases are available for these systems. These can be found on page 52.
Focusable Keplerian Systems

- Can be used as a hand-held monocular in combination with finger ring (Order No. 16711).
- Can be used as a spectacle mounted telescope.
- High level of light transmission and image brightness.
- Small, lightweight and inconspicuous.
- High quality, dust-proof metal housing.
- Very short near point.
- With an intermediate adapter can be used with reading caps 16210-162116 (see page 50).
- Roof prism system with multicoating.
- Supplied with: carrying cord, case.
- Compatible with adapter system 1625 (see page 52).

CUSTOMER BENEFITS

활동적 사용자인 여러분이 움직임에 따르는 경우(지능형 지시).
- 또한 시스템 복합체를 사용할 수 있습니다.

Further technical information can be found on page 78.

Accessories:
167302 Reading cap adapter
- With this intermediate adapter ring, the monoculars 16731 and 16732 can be used with the reading caps 16210-162116 (see page 50).

167303 Reading cap adapter
- With this intermediate adapter ring, the monoculars 16733 and 16734 can be used with the reading caps 16210-162116 (see page 50).

16731 viso-quick finger ring
- The finger ring ensures inconspicuous use and provides stability when used as a handheld monocular.

System carrier frame:
- Special frame for holding optical systems.
- Very light and sturdy titanium frame.
- Soft, adjustable, silicon saddle bridge.
- Spring-hinged, rubberised „golf club” temple ends.
- Demo lenses with grid for simple centering of the lenses.
- Temples 150 mm, can be shortened.

uniADAPT

- Enables Keplerian systems to be quickly and easily mounted onto the carrier frame.

Case for special vision aids

- For storing Galilean and Keplerian systems which have been mounted onto the carrier frame.
- Artificial leather case with zipper fastening.
- A foam rubber insert ensures that the mounted systems can be safely stored and protects them from impacts.

Fitting Case

16321 Galilean Fitting Case

Contents:

1619 Trial frame adapters (3 assembled)
1621 Galilei 2.2 x (2 pieces)
16225 Galilei 2.5 x
16210 Frosted lens
16213 Reading cap 3 dpt
16215 Reading cap 5 dpt
16218 Reading cap 8 dpt
16212 Reading cap 12 dpt
162510 Fitting instructions

16214 Reading cap 4 dpt
16216 Reading cap 6 dpt
162110 Reading cap 10 dpt
162116 Reading cap 16 dpt

1632 Galilean and Keplerian fitting case

Contents as per 16321, but also including:

1619 Trial frame adapters (two)
16731 Keplerian monocular 2.8 x 9
16732 Keplerian monocular 4.2 x 10
16733 Keplerian monocular 4.2 x 12
16734 Keplerian monocular 6.0 x 16
16711 viso-quick finger ring
167302 Adapter for reading caps for 16731 and 16732
167303 Adapter for reading caps for 16733 and 16734

The contents of the fitting cases will enable you to carry out adjustments for distance and near vision with the Galilean systems 1621 and 16225, as well as the Keplerian systems 16731, 16732, 16733 and 16734.
Mounting Kit

- The 1625 Mounting Kit enables all Eschenbach Optik telescopic systems, both Galilean and Keplerian, to be mounted into any special frame.
- The main features of the 1625 Mounting Kit are the carrier lenses made from CR 39, together with the corresponding convergence adapters for working distances of 200 mm, 250 mm, 330 mm and an adapter for distance tasks.
- The convergence adapters allow binocular use in the distance range, as well as in a variety of close-up ranges.
- The mounting kit is suitable for monocular and binocular use in both the distance and close-up ranges.
- If an adjustment error occurs (incorrectly determined visual centre) minimal expense is incurred as only the carrier disks need to be reground.

HANDHELD MONOCULARS

varioPLUS

- A handheld monocular, stand microscope and stand magnifier.
- Keplerian roof prism system, multi-coated.
- High level of light transmission and image brightness.
- Eyepiece cup can be inverted for protection.
- Dustproof, light metal housing.
- Magnification with mounted stand magnifier: 24 x.
- Magnification stand magnifier alone: 3 x.
- Supplied with carrying cord and case.

### laboCOMFORT

- When not in use the shield can be simply lifted up out of the way.
- Headband has an adjustable strap for individual height adjustment.
- The headband magnifier can also be used by spectacle wearers.
- Dark grey, enclosed plastic shield against diffused light and with an integrated lens bracket.
- The headband magnifier can only be used with binocular lenses.

### CUSTOMER BENEFITS

- laboMED and laboCOMFORT leave both hands free for working.
- Comfortable working distance even with a high level of magnification.
- Ideal not just for work tasks but also for leisure and craft activities.

* Shorter working distance due to integrated convergence supporting prisms.

### Accessories:

**1647 laboCLIP and laboMED case**

Contents: 1 each of 164450, 164451, 164452, 164453, 164454, 164457.

(Contents and specification subject to change.)
laboCLIP

- Used with distance spectacles to achieve optimum image quality.
- Lenses easily interchangeable.
- Lens sizes: monocular Ø 40 mm, binocular 74.5 x 28 mm.
- Lightweight.
- Lens clamp made from glass fibre reinforced plastic.
- Supplied with protective box.

Measuring magnifier

- Micromagnifier with illumination.
- Suitable for inspecting a wide variety of surfaces such as metals, textiles, minerals, varnishes, etc.

Precision scale magnifiers

- For technical professions, the printing industry, dermatology.
- Distortion-free image with pinpoint clarity.
- Fine focusing via easy-grip focusing ring.
- Supplied with standard scale no. 115201, measuring range 20 mm, 1/10 mm graduation, size: 23 mm Ø.
- Housing made from glass fibre reinforced polyamide.
- Supplied in a solid plastic box with space for other scales.

11514 LED lighting unit

- For precision scale magnifiers 11547 and 115410.
- Handle holds 2 batteries.

- The wide focusing range enables raised or depressed features (e.g. holes) to be examined in detail.
- The wide adjustment range is even able to compensate for a high level of visual impairment.
- A high level of brightness is achieved as a result of the large lens aperture. Additional illumination is not usually required in daylight conditions.
- Precise focusing with adjustable wheel.
- The light can be used when required.
- Magnification 30 x, glass lenses.

Accessories:

- Precision measuring scales for a variety of applications.
  Order No. 115201, 115202, 115203, 115204

ACCESSORIES & RESOURCE MATERIALS

ACCESSORIES FOR SPECIALIST VISION AIDS

Reading Stand
- The reading stand encourages an upright, orthopaedically correct posture and therefore prevents back pain.
- When the reading stand is used in conjunction with a magnifying vision aid (e.g. system varioPLUS), an optimum angle of view and a uniform distance to the reading material are always achieved, as well as bright illumination of the field of view.

Duo-clip table clamp
- Table clamp for attaching a reading magnifier or additional lighting (e.g. super-lite 2090 light set) to a table top or directly onto the reading material.
- The flexible, black gooseneck metal arm allows reading magnifiers to be placed in almost any position.
- Length of metal arm: 330 mm.
- The plastic clamps on each end have rubber inserts.
- Suitable for tables top with a thickness of up to approx. 4.5 cm.

Replacement bulbs
- 1542 Special halogen bulb
  - For illuminated magnifier 1585 with illuminated.
  - Reading line, 6 V, 2.4 Watt, supplied in a 2-pack.

- 1544 NF lens bulb
  - For illuminated magnifiers 15103, 15105, 15107, 151010.
  - 2.5 V, 250 mA, E10 supplied in a 2-pack.

- 1545 Spherical filament bulb
  - For battery handle 159910.
  - 2.5 V, 250 mA, supplied in a 5-pack.
Easy Vision Reading test

- Assists in the selection of the correct product use.
- Provides supporting sales arguments for Easy Vision products.
- For a test distance of 40 cm.
- With a reading test for visual acuity of 0.1 to 1.0 on the reverse side.
- With test texts from everyday life on the inside pages: small print on the move and at home.
- Material: white, washable plastic, DIN A4.

1625101 Fitting brochure for magnifying vision aids

This brochure gives a clear explanation of how to adjust the Eschenbach Optik Galilean and Keplerian system.

The brochure can be obtained from our sales department.
SALES SUPPORT

Optimum presentation. Visually impressive.
**Optoform IV**

- High quality presentation and storage system for magnifiers, vision aids and other products from Eschenbach Optik.
- The impressive specification makes this system the ideal solution for creating an eye-catching display of product highlights to promote sales and provides a practical merchandising tool for successful sales discussions with customers.
- Elegant glass shelves immediately draw attention to the product highlights on open display.
- In the illuminated display case an entire product tray can be clearly presented behind the protective glass panel.
- NEW: A glazed section above the door now means that the top shelf can be easily viewed from the front.
- The sophisticated design ensures high quality product presentation.
- Enclosed main display unit with door ensures dust-free and safe storage of the trays.
- Flexible tray system presents the product range in a clear and professional manner, ideal for demonstrating products to your customers.
- Illuminated panel with interchangeable advertising image draws the attention of the customer to the product highlights.
- Display unit is equipped with casters - rear casters can be locked to guarantee stability.

**Material:**
Wood effect, white, high gloss

**Lighting:**
LED strip incl. cable route, transformer with 230 V/50 Hz Europlug CEE 7/16)

**Dimensions:**
Total:
W 556 x D 450 x H 1820 mm
Main display unit:
W 556 x D 450 x H 860 mm
Upper display unit:
W 556 x D 98 x H 960 mm

**Weight without product:** approx. 60 kg

**Number of trays supplied:** 5

**Accessories:**
189501 Individual tray

Example of use only:
supplied without insert and without products.

Optimal conditions of use
The optimum image quality of an aspheric lens is achieved by maintaining the recommended distances between the eye and the lens and the lens and the object viewed.

General Technical Information:
All Vision Technology products from Eschenbach Optik comply with the applicable standards and directives of the European Union (EU) and the Federal Republic of Germany and therefore bear, where stipulated by law, the symbol which is valid throughout Europe. This ensures that your customers receive a quality product which complies with the very latest quality standards.

Care instructions:
If the lens of your reading magnifier/illuminated magnifier requires cleaning, please pay attention to the following instructions: a soft cotton or linen cloth should be used for cleaning. The surface of the lens must only be gently wiped over. If the magnifier is very dirty then the cloth should be dampened with lukewarm water. Never use alcohol-based solvents or organic solvents for cleaning the lenses as these can damage the lenses.

Eschenbach Optik products have been awarded EN ISO 9001 and DIN ISO 14001:2004 certification (environmental management) and this is your guarantee of a high standard of quality.
Eye disease

Frequently asked questions concerning visual impairment

What is visual impairment?
A visual impairment exists when, despite applying the best corrective eyewear or contact lenses, vision is still impaired. Magnifying vision aids help the user to see better, despite visual impairment.

What are magnifying low vision aids?
Magnifying vision aids are defined as being all optical and electronic aids which compensate for the loss of vision by providing magnification of the images on the retina. Magnifying vision aids improve the quality of life of those suffering from visual impairment so that they are able to carry out their daily tasks more easily and without assistance.

What are the different levels of visual impairment?
According to this method, a person is considered to have a visual impairment when the visual acuity $cc$ of the better eye is no more than 0.3 (30 % residual visual acuity). Severe visual impairment exists when the visual acuity is 0.05 (5 % residual visual acuity) or less. According to this categorisation, a person is considered to blind when their better eye has a visual acuity $cc$ of no more than 0.02 (2 % residual visual acuity). An eye is considered to be blind if the visual field is reduced to an angle of below 5° (e.g. retinitis pigmentosa).

How does this become noticeable in everyday life?
For example, a visual acuity of 0.6 to 0.7 is sufficient for reading a telephone directory. A visual acuity of 0.4 to 0.5 is sufficient for reading a newspaper. A visual acuity of 0.1 is generally sufficient for a person to be able to orientate themselves outdoors in good light conditions.

What are the most common causes of visual impairment?
Visual impairment can affect anyone, although it mainly occurs amongst the elderly. The causes are also diverse and can differ from country to country.

- Central scotoma due to macular degeneration
  only the peripheral part of the retina can be used for vision, whilst the macula, the area in the retina that is responsible for central vision, is destroyed.

- Tunnel vision due to Retinitis pigmentosa
  As the rods in the retina die off, the field of view progressively narrows causing “tunnel vision”. Retinitis pigmentosa can lead to blindness.

- Reduced visual acuity due to cataracts
  Small sections of the retina do not function properly. In the advanced stage, these small sections grow together to form larger areas.

- Cataract
  Clouding of the lens leads to impaired vision and also to increased light sensitivity.

- Glaucoma
  Increased pressure in the eye leads to irreversible damage of the optic nerve. In chronic glaucoma, central vision can remain for a long time.

What should be considered when advising those with visual impairment?
Even though many people with impaired vision are mainly interested in receiving help with reading, distance vision must also be tested. In the case of visual impairment, by determining the refraction, we can determine the required optical correction which will provide the best possible visual acuity (visual acuity $cc$). This is always the starting point for fitting magnifying vision aids. Please also note the information relating to this in brochure 162510.

How is the required magnification determined?
The magnification required for a vision aid is determined by the ratio between the desired visual acuity to the existing visual acuity using the best corrective eyewear.
Lens Geometry

**Aspheric lenses:** allow a large lens diameter even with a high level of magnification and therefore a wide visual field. All aspheric reading magnifiers from Eschenbach Optik have a focusing distance aE (distance of the eye to the virtual image) of 400 mm. This provides a sharp image with reading glasses which have an addition of +2.5 dpt.

A **diffractive aspheric lens** has an additional diffractive structure for correcting chromatic aberrations.

**Aplanatic lenses** provide an image which is free from spherical aberration and has edge-to-edge sharpness.

**Achromatic:** the combination of two lenses of different diffractive strength for correcting chromatic aberration.

**Meniscus/aspheric Lenses:** a combination of meniscus lens and aspheric lens. Allows larger distances than comparable magnifications using other types of lenses and an image which has edge-to-edge sharpness.

**Biconvex lens:** simple lens with two convex (bulging outwards) spherical lens surfaces.

**Planoconvex lens:** a special type of convergent lens with only one convex surface, the second surface is flat.

**Compound Parabolic Concentrator:** a special lens which collects and concentrates light/illumination optics.

Lens Material

**PXM®** This extremely lightweight and shatter-proof plastic used by Eschenbach Optik has special characteristics which provide maximum optical image quality. In combination with the cera-tec® hard coating, PXM® lenses have a level of scratch resistance which is similar to that of glass.

**Silicate** offers outstanding optical performance, as well as a high resistance to chemical and mechanical influences. Lenses manufactured from silicate are heavier than plastic lenses.

**CR 39** is a very lightweight plastic that has been specially developed for spectacle lenses and offers excellent optical performance.

**Tri-Acetat** rigid films not only offer a high level of elasticity and resistance to breakage, but also excellent optical performance and are therefore often used as the base films for polarised filter lenses, e.g. for polarised clip-ons.

**Polycarbonat (PC)** is extremely strong and hard, with a high level of resilience and due to its outstanding optical clarity and lightweight nature is used in particular for protective lenses in the optics field.

Lens coating

**cera-tec® hard coating:** the extremely resilient coating was specially developed in collaboration with the Fraunhofer Institute for Silicate Research (ICS) for our PXM® lenses.

**DUPLEX coating:** The antistatic coating of the lenses prevents fogging of the lenses.

**Super DUPLEX coating:** Duplex with additional hard coating.

Illumination

**LEDs** are extremely economical to use in comparison to conventional filament light bulbs and have a virtually unlimited service life.

**SMD-LED (SMD: Surface Mounted Device; LED: Light Emitting Diode)** – special, miniature LED with a higher luminous power than conventional LEDs.

**Intelligent automatic shut-off** to guard against unnecessary power consumption.

**Filament bulb**

**Fluorescent bulb**

Batteries

**Round cell**
